Township Council Met Saturday

Passed Resolution Protecting To Department Against Filling In Of Ditches on Highway Without Providing For Proper Drainage

The July meeting of the North Grimsby Township Council was held in the council chambers, Grimsby, on Saturday afternoon with Reeve Oakes in the chair and Deputy Reeve Lawson and councillors Crittenden, Hard and Smith together with the township clerk, Thos. Allan and Road Superintendent Russ in attendance.

Mr. Fred Tuftord of Beamsville appeared before the council with reference to securing extension of water service to his premises adjacent to the highway and near the English Inn. Property. It was pointed out in the discussion on the matter that the most satisfactory way would be to extend the present water main at this point. The work could be done under the Local Improvement Act if Mr. Tuftord secured the necessary number of signatures of property owners. The extension of the water main, it was emphasized would permit of the further extension of the service to others who might build in that vicinity in the future.

The following resolution was submitted by Councillor Smith, seconded by councillor Crittenden and passed:

That this council endorses the establishment of a plant by the Dumbin Distilling Company Limited, in which ungrassed fruits and other fruits, which, from various causes would be unmarketable, are to be used.

Councillor Smith directed the attention of the council to the fact that the Highway Department had filled in ditches on both sides of road adjacent to his property and had omitted to put in tile to provide for proper drainage. This would result in flooding of adjoining properties and injury to fruit trees.

Following discussion of the matter the following resolution was proposed by Councillor Smith, seconded by Deputy Reeve Lawson and passed:

That the clerk be instructed to write the Highway Department requesting against the filling in of ditches on No. 8 highway without making adequate arrangements about draining the adjoining property.

John Hill reported to the council that he had been making his rounds as wood inspector in order to see that the Wood Act was being complied with.

Under the regulations owners of properties who neglect to cut the weeds on their property will have the cost of doing so charged up to them and added to their taxes so that it is to the interest of the property owner to fulfill the regulations.

Reeve Oakes informed the council that the Highway Department was much pleased with the decision of the township to erect warning signs at rail-way crossings throughout the township. These signs are now completed and will be erected this week.

Councillor Hurst also suggested the erection of signs at the entrance to the municipality on the principal roads so that the motorist would know when he was entering the township. The suggestion was favorably commented upon by the other members of the council.

No action was taken on the application for a permit for a gasoline station presented to the council pending the securing by the applicant of the required number of signatures of adjoining property owners.

In response to an enquiry regarding licences in connection with stands along the highway it was intimated by Reeve Oakes that if vendor sells his own fruits no license fee is required. However, if he sells candy, cigars, etc. a fee of \$15.00 is charged. Anyone who buys fruit and sells it again is also required to have a license.

It was stated that the council would strike its tax rate for the year at the next session.

Council adjourned about 5:30 o'clock.

ENJOY MOTOR TRIP

Mrs. R. H. McNally, North Cobalt spent a few days last week with her mother Mrs. W. L. Stephen and brother Thomas J. Stephen. Mr. McNally with her son, George and Mrs. McNally had a wonderful motor trip across Ont. from Visalia and North Cobalt to North Bay, Ottawa, and Montreal. They returned by St. Lawrence route from Montreal to Cornwall, King's, Belleville, Ottawa, Toronto, Hamilton, London, Chatham and Windsor. From Windsor they went by bus to Hamilton and by electric car to Grimsby, from Grimsby by C.N.R. to Toronto and North Bay, Ont. T.O. home to North Cobalt. Mr. McNally was delighted with her trip which was made without a single mishap.

SPRAY FOR PLEA BEETLE

The following item regarding spray for beans, handed to the Independent by The Supreme Canners Limited is communicated by the Experimental Farm at Vineland to growers of beans as being effective in combating the beetle. It is pointed out that it should be applied at the present time but should not be used during heavy blossom.

Spray with 3 pounds Blue Stone, 6 pounds Hydrated Lime, to 40 gallons water or one bushel with Bordeaux Mixture.

Largest Jitney in History of Club Held on Friday

The largest attended and most successful series of Jitney games in the history of the organization were played on the greens of the Grimsby Lawn Bowling Club on Friday evening last when eighty bowlers took part. The greens were in splendid shape and everything combined to make the occasion an enjoyable one.

Handsome prizes were awarded as follows:

Gents, First, George Bolton, 21 piece tea set; Gents second, David Aitken, water set; Gents Third, W. F. Randal, China cup and saucer.

Ladies, First, Mrs. C. H. Walker, 18 piece tray-set; Ladies second, Mrs. Daniel Cloughley, tea pot and sugar bowl.

Low score, Mrs. Henshaw, Vine-land, cream pitcher.

Bowlers from Beamsville and Vineland in addition to local bowlers also took part. The open mixed Jitneys are held every Friday evening at eight o'clock, and are open to any member of a lawn bowling club.

On Saturday, July 19th, a tournament will be held beginning at one o'clock sharp, standard time when four prizes will be given.

Winona Man Fatally Hurt

Struck in Rapid Succession By Two Cars at Vineland

Struck in rapid succession by two cars Nicholas Crouch, Winona, was fatally injured at Vineland Sunday night. Andrew Noradski, Beamsville who was with Crouch, escaped with minor injuries. The two men were waiting at Vineland corner for a bus and for some unknown reason wandered onto the highway where they were struck by an east-bound car.

The impact threw Noradski into the ditch and Crouch across the road where his posture from was almost immediately struck by a west-bound car driven by Charles J. Lawler of Tagoval. The second impact threw him about 27 feet further down the road.

The two cars struck Crouch within few seconds of each other. Mrs. Myrtle Tuftord, 29, Franklin Street, Buffalo, who was driving east on the main on the highway directly in front of the oncoming car, but, despite, that he was her car which struck him.

Dr. W. E. Hubbard of Vineland and Traffic Officer Bert Howell were called. Dr. Hubbard had the men removed to the St. Catharines General Hospital where Crouch, who had a fractured skull and punctured lung, died at 5:20 Monday morning. Noradski is not seriously injured and is progressing favorably. H.T.O. Howley is investigating the accident but as yet no charges have been laid against either driver. An inquest will be held at 3 p.m. on Thursday, Aug. 24th. W. Elmore, of Beamsville, as coroner.

Soft Ball Teams Played Tuesday

The Junior Farmers were winners in Tuesday night's games and as winners in Trinity Church were losers. The score being 16 to 6. This does not indicate that the Junior Farmers were not much better. It looked as if at one time as though the Trinity Boys would overcome the big lead but their poor fielding was their downfall. Their pitcher worked hard all the night and game and pitched a good game and with support in the field no doubt will be the talk of the town.

The second game was a loose affair between St. Andrew's Club and the Metal Craft. Unfortunately St. Andrew's long little pitcher and ball player Davis Caruthers met with a slight accident which kept him out of the game.

MacPherson took his place and Mac did not well. In fact it is not the Metal and Steel game all the time to find him at times. In this game his fielding was very noticeable and if the cockneys tightened up the score would not have been 7 to 3 but he was able to give the hospital mechanics credit and he is hoping.

A meeting of the executive will be called this week to arrange for the play-off games. These games will be looked forward to with a great deal of interest.

And the games Friday night will be with a long night to look for the Model Dairy club with the Metal Craft business as usual. It is to be wished with the West End and is to be wished every there should be a good crowd of the senior on hand for these contests.

In Memoriam

Review Grape Juice Tariff

Niagara Peninsula Represented At Hearing Before Tariff Board At Ottawa

In police court held in the council chambers, Grimsby, on Tuesday afternoon before Magistrate Campbell, a number of cases were disposed of.

Three cases were tried under section 6 of the Highway Traffic Act, penalties being imposed for failure to produce operator's license when demanded by the police officer. The three men in question, Harry Stepp, Roy Lippel and Walter Weller were each fined \$10 and costs of \$15 or 15 days in jail. The first two paid their fines, the last named being allowed a week in which to pay fine.

The assault charge preferred by Mrs. Heathcote against John Dick was dismissed by the magistrate after he had heard the evidence of complainant and the defendant with their wives.

The coming into force of the Volstead act in the United States was referred to by the growers and manufacturers as having had a decided effect upon the Canadian grape and wine market. Prior to that act, grapes in the United States commanded a price of \$60 a ton, but now there is a great surplus, particularly in California. Because it is unlawful to destroy foodstuffs, grape growers were forced to find markets for this surplus. Due to a process recently discovered it was found that the juices could be concentrated and shipped into Canada of a price against which Canadian growers could not compete, it was declared at the hearing yesterday.

At the last session of parliament an item was inserted in the tariff making the duty on grape juice 25 cents a gallon when it had a specific gravity of not more than 1.074 and adding three cents a gallon for each ton thereafter.

This provision was contingent upon an order-in-council being passed. Hon. C. Dunnus, minister of finance, explained at the time that it was not quite certain whether the proposals would meet the situation. The hearing yesterday was to determine the facts in the case for the government's consideration.

It was estimated that concentrates could be brought into Canada under the present duties at what would correspond to \$32 a ton for fresh grapes. Grape growers in Niagara peninsula have been guaranteed \$65 a ton for their products this year. Under the proposed higher duties those set out in the tariff item which would come into force only by order-in-council, the concentrates would be subject to a heavier corresponding to approximately \$40 a ton.

The board was assured by the manufacturers that this act would short out the competition to a very considerable extent.

Hector Racine acted as champion for the first motion in the board. W. H. Moore resigned in order to take the general election campaign.

HOME BY TELEPHONE

When you are housebound—turn to your telephone. It will take you home in a few minutes and it is the best thing to bring there in person. An out-of-town call nowadays is as simple and easy to make as a local one. Reduced evening rates begin at 7:00 p.m. and the cost is surprisingly low. You can talk a hundred miles or more for about the price of a movie.

The candidate of the Conservative party in this constituency is Hon. J. D. Chaplin and the standard bearer of the Liberal Party, Mrs. F. S. Greenwood.

May Let Peaches Rot

A despatch from Foremost Cal, under date of July 1st states that Forty per cent. of California's prospective record-breaking 1930 crop of canning peaches may be left to rot on the trees in order to maintain a strong price.

The growers this year face a probable crop of about 420,000 tons of canning peaches as compared with 170,000 tons sent to market last year, when the price skyrocketed to \$20 a ton.

This stated that should the growers throw on the market all they produced the price would sink below the cost of production.

Following dinner addresses were delivered by number of those present the president, Mr. Geo. Nichols presiding.

Mr. Seaman loves his flowers and speaks of each one with real affection. "Just look at this. Isn't my black hollyhock a beauty?" and it is black as ink, unbelievably black. "This black hollyhock must have dug down deep in the earth hunting around and assimilating all the bad he could find to make him so black." All of Mr. Seaman's hollyhocks are very unusual.

One London Dawn

By Lulu Davis

In the dark hours before the dawn, a band of adventurers come driving into London.

They come from the country, driving through the dark lanes at first, in vans piled with fruits of the generous English earth, to sell in the dawn at Covent Garden Market.

Elizabeth Leverett was one of them. She drove her father's van, because Leverett himself was ill. He was a brave, obstinate man, whose leg had been injured in the war, and further injured because he would not stop digging in his market garden until the doctor drove him to bed.

Since then Elizabeth had taken his place in the fields and in the hot-houses. She had helped to grow the fresh strawberries packed in baskets behind her in the old Ford van. She had helped to pick them, to sort them, and to stack them in their baskets; and she had gone to bed, tired out, at ten o'clock. She had risen before two in the moonlit morning, to join the band of adventurers who drive their wares to London, to the market which is built on what was once a concert garden.

Elizabeth drove at first through some of the loveliest country in England; she passed gardens from which enchanting scents drifted on to the moonlit lanes; she heard nightingales sing, and saw the summer stars grow pale before a midsummer dawn; she smelt the honeysuckle in the hedges, and all the time she was thinking:

"Two hundred pounds—no, two hundred and seventy-five—and then we could always be sure of water in the meadows. If I had that money, and a strong, willing man who wanted to help, I'd pull the lot of us out of the mud. Two hundred and seventy-five."

For Elizabeth, at twenty, with eyes the color of blue lace, and skin with the warm whiteness and fragrance of white lace, had no time for moonlight, or nightingales, or loafing between the summer hedges with a good companion. She had to consider arithmetic, and how, if she should bring back as much as eight pounds for her strawberries, she could pay the water rate.

At last, before the dawn was more than a rosy in the eastern sky, Elizabeth came to London town. At this hour London was already waking. Other vans were rattling towards the market, and the street cleaners were busy. But here and there, behind curtained windows, shafts of light shone out, to show that to some folk it was still night.

Near Covent Garden the traffic and density increased; until it became impossible to drive quickly. Vans of fruit and vegetables were in front and behind blocking the road.

Finally, outside a tall, grey house, Elizabeth had to sit still and wait, in company with many other van drivers, all of them anxious and impatient; for the narrow street ahead of them was closed by a middle-aged farmer from Sussex, whose van had broken down. He had been bred among horses, and could not understand engines. He sweated and struggled with his van and, with the advice other drivers poured out to him.

Elizabeth, patient when impatience did no good, sat still and looked about her at the City who has always something new to show her lovers.

In the tall, grey house beside her there were three windows that showed yellow light behind their drawn curtains. She watched the curtains, which sometimes stirred, and wondered what they hid. The windows were ugly—too narrow and tall—and the framework of the balconies in front of them was dingy.

While she watched one of the windows suddenly became dark. Evidently the time had come when this house, too, was reluctantly to submit with the night. The second window, directly beside Elizabeth, grew pale as some of the lights were switched off.

Then, while there was still a little light left in that room, a young man came to the window and parted the curtains to let in the down light which was growing clear. He must have been unknown to anyone in the street, but from where she sat Elizabeth could clearly see his head and shoulders and his hands.

They looked at each other gravely; then Elizabeth smiled.

"Breakfast," she said. "I know a place near here where we can get coffee and ham and eggs. You've been very kind, and I can't give you a tip, because you're a gentleman. I think if you really are one you'll let me give you some coffee—so set my mind at rest."

He followed her into an eating-house which she seemed to know, and sat down with her at a quiet table. She ordered breakfast for two; and after it had been eaten and paid for she spoke:

"Now, about that revolver—have you used it already, or are you thinking of using it when I leave you alone?"

"Ahi! So you saw that?"

"Yes."

"And being a young woman of character couldn't let it rest there? No, it would be your duty, of course. I'm afraid it's an ordinary story. Middle-class decent relatives who died too young, a snobbish school which only teaches the young how to spend money, and then an inheritance. And since that, a binga." He said with some satisfaction: "It really has been a classic al binga, my dear!"

He wore evening clothes and he held something in his hands, which he was examining closely; and Elizabeth saw that he was looking into the barrel of a revolver, which he held open in his hands and appeared to be loading.

Then, as the last light was switched off in that room, he stopped back between the curtains and vanished.

Elizabeth wondered if she had seen the beginnings of a murder or of a suicide. She hesitated. Either must be stopped. Yet what can a girl from the country, in charge of a van which must not be left, do about so strange a thing as this? She looked up and down the street for a policeman, but there were no pedestrians. She threw off her rug and prepared to jump down from her seat, when the door of the house opened and the young man came out.

He was pale and haggard. He turned north and began to walk quickly away. But, murder or suicide, he must be stopped—for someone else's sake, or his own. Before he had gone ten feet Elizabeth called to him sharply:

"Young man, come here!"

He hesitated, stared at her, and then said pleasantly:

"Is there anything I can do for you?"

He was too direct and candid, she thought, to be a murderer; it must be suicide. And at that moment the released spirit began to move forward again. Elizabeth had to move forward too. But not without this strange young man, for she had inherited her father's courage. She pointed urgently to the seat beside her. It was unthinkable that on this lovely summer's morning a decent young man should be permitted to go away and kill himself.

"Come up, please!" she said.

The young man, still more amazed, stood still.

"Please!" Elizabeth repeated. And the young man, looking into her blue eyes, obeyed.

Nearly anything, he knew, can happen in London; but never before, after a night of hectic and rather depressing entertainment, had he come out to the pavement to find a strong-willed beautiful young woman driving a van of sweet-scented strawberries who insisted that he should sit beside her.

"I think," he said to her, "as he climbed into the seat, 'that I must have fallen asleep reading the 'Arabian Nights Entertainments.' Don't wake me, will you?"

"Home!" he said.

We at the report of the Department of Agriculture that fewer persons are leaving the farm. There are fewer persons on the farm to leave.

A mola found in South-West Africa, and known as zinckblende, produces a bright light when struck or rubbed, even under water.

Miner's Liniment gives quick relief.

"My name's Elizabeth Leverett. Ah, the bing is bugged!"

"I took to playing cards for money. I took to that last week with, I'm afraid, the wrong playmate. They have my inheritance and my cuff-links, but I have the gun you see."

"And your strength and your health and some humour. You're all right. All you want now is work. You never seem to have had any of that. I believe you'll enjoy work when once you get used to it."

"Perhaps. But being restrained—"

"That doesn't matter. I can give you work; and train you, too."

"Elizabeth, you're—royal! But—"

His voice faltered.

"Listen! We're not a market garden; but my father's ill, and I've got more to do than I can manage. Will you help me? I can easily train you; and it's fascinating work, and you can make money if you know your business."

"It would be great work to help you. But do you really need help?"

"All the way up to-day I was wondering where I could find a little capital and a strong, reliable man to help me to pull things out of the mud."

"Then when do you start?"

"You can come back with me this morning; but you can start now—by giving me that gun."

He chuckled and drew from his coat-pocket two small ivory pistols, an quaintly made and ornamented with gold.

"Japanese work," he said; "very rare and old and perfect, and worth £100 or £120. Your capital and mine, Elizabeth. I was them earlier in the evening, and I was looking them over before I went out to sell them when the shop opened."

"Then you were going to—"

"Quitting? Not, I was going to sell them and settle down to work. Life's not interesting working with you, Elizabeth," he finished softly.

He looked at her steadily. And Elizabeth found herself remembering the moonlight and the nightingales and the gardens she had had to pass by, and the honeysuckles she had never seen up to.

"I think we'd better be going—"

"Home!" he said.

Gland Secretions Used in Treatment of Eyes

Detail.—The latent development in the use of glandular substances to treat disease is the application of this method to the relief of eye diseases. The powerful secretion of a gland was used to treat progressive short-sightedness in 100 patients who told members of the American Medical Association meeting here by Dr. Meyer Wiener, eye specialist of St. Louis.

From the suprarenal glands, small cap-shaped organs lying just above the kidneys, comes the potent epinephrine or adrenalin, as it is more commonly known. This substance has been extensively used as a stimulant. Dr. Wiener found its stimulating properties beneficial to near-sighted eyes. Near-sightedness, or myopia, is not a disease in itself, Dr. Wiener explained, but is a sign of congenital weakness. This weakness affects the entire part of the coating of the eye, so that the eyeball stretches and the lens of the eye gets out of focus. The person so afflicted is nearsighted.

Because of these things she passed the first policeman they met.

The young man, sometimes leaning out of the van to ask advice himself, brought her safely to her destination. He stood with his hands in his pockets watching and listening while she sold her strawberries. He concluded, as she prepared to come away with nine-pounds-ten and no fruit, that this could hardly be the first time he had encountered the baffling upstart of Covent Garden at four in the morning. His curiosity increased.

"And now?" he said, when her business was finished.

They looked at each other gravely; then Elizabeth smiled.

"Breakfast," she said. "I know a place near here where we can get coffee and ham and eggs. You've been very kind, and I can't give you a tip, because you're a gentleman. I think if you really are one you'll let me give you some coffee—so set my mind at rest."

Dogs Fed Soft Meat Live to Ripe Old Age

Do Not Feed Your Dog Choice Cuts—Prefers Cheaper Grub

To make dogs live to a ripe old age and stay healthy, do not feed them the choice cuts of meat, but give them the soft internal organs, the parts usually thrown away. That this is the proper way to feed our canine pets is vouches for by Dr. William Lentz, director of the small animal hospital of the University of Pennsylvania. In a long research on the longevity of dogs Dr. Lentz has found that dogs reaching a life span of twenty years or more, the greatest majority had access to the waste meat materials, the scraps, the soft inner parts and the various unused glands thrown away by butchers. Dogs so fed lived from three to four times as long as dogs fed a choice meat diet of the better portions of the firm muscular meat such as are eaten by humans.

The dog, left to himself, is ordinarily carnivorous and follows the instinct of his wild cousin in eating the finer organs rather than the muscular flesh. It appears that these animals derive some benefits from the softer diet and from certain chemical properties of the glandular organs.

One of the main reasons for the relatively short life span of dogs is that they can eat no more. Any further eating after saturation point has been reached are stored away in odd corners until the time when appetite returns.

"Why not use it to construct a nice little gas chamber where humans and friendly old men can be treated to a painless death?"

As a contemporary crack on this viewpoint in regard to dog dietetics, it is interesting to know that Dr. Herbert Fox, director of the pathological laboratory of the Philadelphia Zoological Society, in studying a dog's stomach which had been placed in a bisquit which had been placed in the cage. Another snake of the same species tried to swallow a hamster's pole which was being used to push forward a dead rat.

It got about two feet of the pole through its throat before it discovered its error and began to sit. After much painful struggling the unnatural diet was happily digested.

The monkey tribe, generally speaking, has a tough digestion, which is as well, since more visitors flock to the monkey house than to any other. What is more, some monkeys discriminate quite wisely in what they eat. One of them, given an ice-cream cone, very politely handed it back to the donor.

But perhaps the orang was even wiser. When he was given ice-cream he applied it externally, emptying it over the top of his head.

The toughest digestion in the whole Zoo is undoubtedly that possessed by the ostrich. A digestion like an ostrich's we often say—an ostrich that has become a proverb—and there is some truth in it. Unfortunately, even an ostrich can overdo things. One Zoo ostrich died because some "kind" friend had fed him with a tin-can.

The ordinary food given to the animals by the authorities is carefully selected and contains all the needed food factors, so that it isn't really necessary for visitors to feed the animals at all. However, human nature being what it is, visitors are allowed to give certain foods to certain animals, and to help them here are the substances setab's for some of the popular favorites.

Visitors may, give to the bear-bread, buns, biscuits, fruit, sugar, honey, treacle, and jam. He who offers a tin of treacle, with the lid removed or a hole punched in it, to old Bruin has an amusing time in front of him.

No Never says "No."

Monkeys are strictly vegetarian. They may have fruit, lettuce, biscuits, buns, and sugar. Parrots may be given monkey-nuts and fruit and green shoots with the bark, but what Polly loves best is perhaps a boiled banana. Give him one with the skin on and watch the result. It is worth while.

A point to remember is that monkeys must not be given to aquatic animals, or, indeed, offered to any animal except monkeys, squirrels, and parrots. No food at all may be given by visitors to the larger carnivores, small cats, or others, for there is always consolation to be found in old Jumbo. Although each elephant has a regular authorized ration of over 200 lb. of hay, corn and roots per day, visitors are welcome to bring along a basket.

There is no doubt that many animals do gain by the experiment of being fed by visitors, and the varied additions that come that way ensure their receiving a full meal of vitamins. But, once again, the brave must be fed on suitable food. —Answers.

Zoo Animals Have Tough Digestions

By Cyrus Hill

Generally speaking, most animals refuse to touch food which they do not "like to" by instinct, but there are some which will readily eat almost anything that is offered, whether it is food or not.

Some time ago a certain fellow deer became known for his odd habit of eating paper, with the result that people piled the unfortunate animal with this very unusual form of nourishment until it died. A post-mortem examination showed that its stomach contained sixteen pounds of newspaper and paper bags! You may say that the animal should have known better, but what about the visitors who fed it?

Doctors Hopeful For Cancer Cure

Dr. MacCarty of Mayo Clinic Tells of Fifteen Factors in Recent Address

Baltimore.—What chance for recovery has the cancer patient? How long will he live? The answer to these questions, of such vital interest to the sufferer and his family, were given in a consideration of 15 factors by Dr. William C. MacCarty, of the Mayo Clinic, at the meeting here of the American Medical Association.

One of the most important factors is location of the growth. The more gland that is attacked the shorter the patient's life will be. If the cancer is so located that it produces pain or bleeding, or obstruction in the early stages, the better the patient's chances because he will get early treatment. If the cancer grows inward on an organ the chance of recovery is worse than if it grows out from the organ. If the heart and kidneys are functioning efficiently the outlook is poor. Size of the growth, age of the patient, loss of weight, duration of the disease and the way in which the cancer cells act in the body all have an influence on the patient's chance for recovery, but the exact significance of these factors is not certain.

When the cancer is on the breast, the outlook is good. This type of cancer can be permanently cured when it is recognized and operated on in the early stages, Dr. Arthur Dean Deane of Rush Medical College, Chicago, said. Breast tumors occur in about three women out of every 100, he said. Of 300 women who came to a clinic during the year, complaining of a tumor growth of the breast, only 200 "some have a tumor."

Half of these women have a benign tumor and half a malignant tumor. In malignant tumors the outlook is good if the disease has not spread to adjoining parts of the body, such as the glands of the arm.

X-Rays, Beneficial

The use of X-rays and radium after operation on cancer of the breast gives much better results than the operation alone, Drs. Hugh P. Trout and C. H. Estes of Roanoke, Va., reported as a result of 30 years of experience in these cases. These physicians were impressed with the fact that cases of cancer are being seen earlier than ever before, and that therefore, results of treatment should be better than ever.

The public is not yet sufficiently aware of the need of early discovery and treatment, another speaker on cancer, Dr. William H. Kramer of the tumor clinic, Jefferson Hospital, Philadelphia, said. He declared that cancer threatens the very foundations of civilization. In all the discussions of cancer by the country's leading experts on the subject, only radium, X-rays and surgery will lead and electro-surgery as adjuncts in special cases, were mentioned as treatments which could lead to cure of the disease. The average patient does not yet realize that these are the proved methods of treatment. He has not had sufficient faith in the medical profession, and that is why patients by the thousands will follow fake cancer cures around the country, Dr. Kramer said.

Fever Treatment

The use of fever in treating diseases are growing, intent to be reported in its use in curing lameness, described by Dr. H. G. McRae of San Francisco. In hardening of the arteries and certain other diseases attacking the blood vessels of legs and arms, a combination of symptoms known as claudication occurs.

A patient may be without pain while resting, but on moving about he will develop such pain or weakness that he can no longer stand. Such a patient can be helped by being kept in a very hot bath, about 110 degrees Fahrenheit. The baths are repeated daily for two or more weeks and in many cases give permanent relief.

For the child who has developed anemia after a bout of whooping cough, rickets, bronchitis or similar weakening disease, injections of iron directly into the lining of the abdominal cavity are beneficial, Drs. Clifford and Gruber, of Chicago, reported. Treating this secondary anemia with iron has formerly been a tedious process, iron taken by mouth or injected into the arm or a vein does not regenerate the blood very quickly. The new method, which is supplemented by ultraviolet ray treatments, gave good results on a group of six young children. They all gained weight and improvement was still in evidence eight months after the treatment. The method has no effect in primary anemia or pernicious anemia, Dr. Gruber emphasized.

Planes Have Far to Go?

Considering that the total output of passenger cars, trucks and taxicabs in the United States for the first four months of 1930 was 1,416,500, it is clear that the airplane has quite a distance to go before it will have caught up with the automobile.

During an Air Ministry test of a large supermarine flying boat at Southampton which is controlled by an automatic gyroscopic system, something went wrong and, probably much to the human pilot's surprise, the craft looped the loop and then flew on again as a level flight.

A Real Nerve Tonic

Is a Beautiful Supply of Rich, Health-Giving Blood.

Sufferers from nervous debility and rheumatism tired, low-spirited and unable to keep their minds on anything. They are totally unfit to perform their everyday duties.

Destressing the nerves with sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich, red blood. To secure this rich, red blood Dr. Williams' Pink Pills should be taken. Enriching and purifying the blood is their whole mission. Considering them Mrs. Albert Bechtel, Detroit, Ont., writes:—"Two years ago I was a complete wreck; I had for seven months; extremely nervous but no color. Nothing I tried seemed to help me till I began Dr. Williams' Pink Pills. My condition at once improved and to-day I am well and able for anything without fatigue or trouble."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Helpful Hints!

It is a mistake to keep biscuits in the same tin with candies. If placed together, the former quickly becomes soft.

If meat is not to be used at once in hot weather, sprinkle a little pepper over it. This not only discourages flies, but helps to conserve the juices.

Milk will keep fresh for a considerable time if it is washed in cold water in which a little carbonate of soda has been dissolved.

Biscuit will not stick to the knife while chopping if a little ground rice has been sprinkled over it.

When trying foodstuffs care should be taken to avoid placing too much in the pan at one time, as this decreases the temperature of the fat.

Add a few drops of lemon juice to rice while it is cooking. This not only whitens the rice, but separates the grains.

Biscuits will not shrink while frying if they have been dipped into flour.

Planes are taking shape for the inauguration of a regular air service between Manchester and Blackpool, consisting of a daily trip that will take 50 minutes for a journey that takes twice that time by the fastest train at present. The existing round-trip fare for the Manchester-Blackpool trip is £1, but expectations are that this will be reduced to approximately £1 for the single journey, with the possibility of further reduction if larger machines can be acquired for the journeys.

Minard's Liniment Checks Colds.

Copenhagen Union Purchase Island To Be Used as Children's Playground

Copenhagen.—After somewhat protracted negotiations the Union of Copenhagen municipal teachers have bought the charming island of Thor, off the coast of Funen, used as a school, and almost opposite the ancient and picturesque town of Assens. The recent owner had spent large sums of money on it and, amongst other things had erected a colossal bronze monument of the old Northern god Thor, after whom the island is called, and which cost twice as much as the teachers have paid for the whole island, with residence, outbuildings, museum and a fort. The Copenhagen Municipality has guaranteed the purchase sum.

The purpose is to turn this island into a holiday resort or "colony," as they call it in Denmark, for Copenhagen school children, and for which purpose it is simply ideal. Some more cows will have to be added to the 110

Arabian Spices and Mysteries of the East Lurk in Jerusalem's Byways

"Plum"—Rice Cooked in Fat—Spiced English Beef and Midget Porters Fascinate Visitors

Jerusalem.—Exotic corners of Jerusalem are being explored by a Palestine journalist who describes out-of-the-way places where tourists rarely go, yet where it is to be found much of the variety of color and interest with which Jerusalem is filled.

"A lot with eight people appeared into six seats will take you right into the Balkan Quarter," the description says, "where people wear short-sleeved colored dresses which, resplendent in Balkaria, have not lost all their resplendence in Jerusalem. Here you will find seats which make the mouth water. The colors are perhaps a little gaudier than you may like and the gold and silver thread may seem a little too rich for you to take back with you to number London or to some other unwise city of the West. You will try and secure a meal in the houses of a Balkanite. He will give you a slice of plum, which is like the taste of all the tortuous varieties of India. It is merely rice cooked in a bath of fat. But if you cool rice in

fat, you won't get胖. There are pictures of exotic cooking behind the scenes.

"I mentioned plum when talking of the Balkan Quarter, in the Georgias Quarter you can have a meal of shashlik. It is English roast beef with the mystery of all the East in the roasting.

One of his colleagues pulled at his coat and in a hoarse voice whispered, "Daniel Webster didn't write the dictionary; it was Noah."

"None nothing?" replied the speaker. "Noah built the ark."

There is no tragedy comparable to that of old age without funds to pay for its necessities.

It's a pity—"Does she look her age?"

Wife—"No, she overlooks it."

Covering up the truth opens up an argument.

One woman who wouldn't look other women in the face is sure to look her in the back when they pass on the street.

Good habits are easier formed than bad ones broken.

"The jig is up," said the doctor, as he viewed the man who died of St. Vitus' dance.

You don't need a blouse to beat trouble, nor does to cover it up.

Did you ever see a mosquito wrinkle with temptation?

Trust Officer—"Why haven't you sent your son, Johnny, to school?"

Fraud Father—"It's not necessary, now that we have the talking movie."

The honeymoon is over when the bride discovers that her husband makes the same kind of noise her father did when he parts with some money.

No matter how well any man or woman may know their stuff if they have mean dispositions it does them no good.

Dad—"Why, Mildred, I am surprised! Aren't you going to give your brother part of your apple?"

Mildred—"No, daddy. I've did and she's been havin' out for it ever since."

Friends, like stars, shine bright when one's world is dark.

Sarah—"How did the wedding go off?"

Franey—"Fine—until the person asked the bride if she'd obey her husband."

Sarah—"What happened then?"

Franey—"She replied: 'Do you think I'm crazy?' and the groom, who was in a sort of daze, said 'I do!'"

Hot July Days

Hard on Baby

July—the month of oppressive heat; red hot days and sweltering nights; it is extremely hard on little ones. Diarrhea, dysentery, colds and cholera infantum carry off the thousands of precious little lives every summer. The mother must be on her guard to prevent these troubles, or if they come on suddenly to treat them. No other medicine is of such aid to mothers during the hot summer as is Baby's Own Tabloid. They regulate the bowels and stomach, and an occasional dose given to the well child will prevent summer complaint, or if the trouble does come suddenly will banish it. The Tabloid are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Wrestling matches between women are the latest exhibition offered to amateur workers in Paris.

"It's great stuff," says the old Corporal. "Day-day night I drank two quarts of it an' I didn't even stagger."

"Two quarts!" gasped the John.

"'em? Ya didn't even stagger?" "Hock, no," says the old Corporal, "I couldn't even move."

God give us men. And women instead of 30-year-old fappers.

Owl Laughs

I'd rather see a worm than hear one say day,
I'd rather see would walk with me
than merely tell the way;
The eye's a better pupil and more
willing than the ear,
Please counsel is confusing, but example's always clear;
The best of all the preachers are the
men who live their creeds
For to see good put into action is what
everybody needs.

Having a talking picture of your
wife is all right if you are deaf and
blind.

Pretty Saleswoman — "Don't you
want a talking machine in your
house?"

Bachelor—"This is an oddity."

The home is safe so long as women
are more interested in cooking schools
than card games.

RED ROSE TEA

The Lace Box

Sylvia came running to her mother with a piece of lace. "May I have this to dress up with? I want to be a queen."

"May? not! Where did you find my Valentine lace?"

"It was in a box on the closet shelf, and you don't wear it any more!" A girl was appearing in Sylvia's chintz.

Mrs. Burton was just putting on her hat, but she took it off, and going to the closet, carried the lace box to the bed. A pang of memory shot through her. She could remember her own mother gently unspooling the blue lace paper covers, taking out a christening robe and saying: "Three Sylvias have been christened in this dress. See the lovely little pink, and the lace it is trimmed with is real Valentine lace." Now a fourth Sylvia had been christened in that same dress—her own little Sylvia, who was looking at her with tears of disappointment.

Fraud Officer—"Why haven't you sent your son, Johnny, to school?"

Fraud Father—"It's not necessary, now that we have the talking movie."

NOMINATIONS ON MONDAY

Next Monday is nomination day in the riding of Lincoln, and in many other constituencies throughout the Dominion when the names of the candidates will be formally placed in nomination.

The two candidates in this constituency chosen by their respective parties, are Hon. J. D. Chaplin who has served as the riding's representative in the Dominion House for several terms, and is again the choice of the Conservative party, and Mrs. F. S. Greenwood, who is the standard bearer of the Liberal party. They are the candidates who will contest the constituency and at the public meetings which have been held throughout the district have discussed the issues before the electors while the merits of the proposals set forth by each party have been emphasized.

With the formal nomination of the candidates the campaign, during the coming week, will enter the concluding stage, culminating in the election on Monday, July 26th.

The contest in the riding of Lincoln differs from that of almost every other constituency in the Dominion in that a woman is in the field as the candidate of one of the principal political parties. The outcome will accordingly be awaited with more than usual interest.

ERADICATING WEEDS

Property owners in Grimsby and the surrounding districts as well as elsewhere throughout the province, in compliance with the Weed Control Act, have been engaged during the past few weeks in cutting and destroying noxious weeds on their lands and premises. Where owners fail to comply with the regulations the weeds will be cut by the authorities and the cost of doing so will be charged against the land and collected with the municipal taxes.

It is encouraging to note, however, that the campaign which has been waged by the Department of Agriculture in co-operation with the municipalities, has been attended with good results and there is evident a growing appreciation of the necessity of eradicating noxious weeds so that they will not gain a foothold and make the land unproductive.

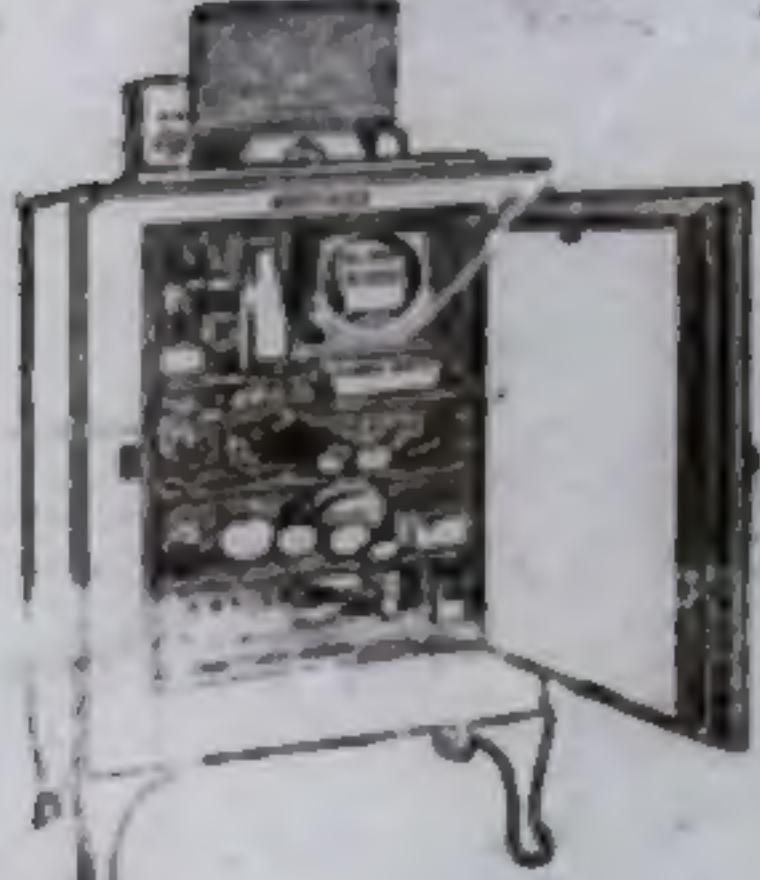

In Lincoln county the campaign has been energetically carried on under the direction of inspectors and every effort is being made to assist the Department of Agriculture to attain the objectives of the campaign.

UPHOLSTERING

Having secured the services of a first class upholsterer from Ottawa, we are prepared to do any kind of upholstering desired. Notify me and we will call for furniture, give you an estimate and deliver it when finished.

The Week's News of
The Surrounding District

BEAMSVILLE

Dr. G. F. Alderdyce, a resident of the township, died in the Toronto General Hospital on Friday. Deceased had been a resident here for nearly five years. Interment took place at Shanty Bay on Saturday. His widow survives.

Ken Falby, Cochrane is spending his vacation with his parents here.

Miss Ethel Barrett, Toronto, is visiting Miss Anna Merritt.

A delegation from the local Orange Lodge was in the big walk at St. Catharines on Saturday. County Marshall James Konkle, of Beamsville, led the parade.

Miss K. H. Carpenter, of Los Angeles, Cal., was the guest of Miss G. How.

R. B. Bennett will speak in the final week.

Miss Anna Merritt, Toronto, is visiting Miss Anna Merritt.

The postponed tournament of the Bowlers club for the obsequies of the former's mother.

Miss Frances Culp is holidaying in Montreal and Quebec.

Mr. H. Terwillinger and Mrs. J. A. Sinclair are on a motor trip to New York.

Mr. and Mrs. Joseph Falby, Mr. and Mrs. L. Lindner, the Misses Robinson and Mrs. J. H. Kennedy were in Burlington last week for the Falby-Lindner wedding.

STONEY CREEK

On Monday afternoon the council made an inspection of the roads on the Mountain and were very well satisfied with the condition they found them in. Some of the councilors expressing themselves the roads were never in better shape. Road superintendent D. Bishop has a stone crushing outfit operating near Vinemount, building some roads for which the farmers in the immediate vicinity of the haulage have agreed to pay for the hauling of stone.

Mr. and Mrs. Elmer Dickey and family have returned home to Buffalo, having spent a few days at the home of Albert and Mrs. Dickey.

In county court last week many dog owners in the township found out to their dismay, that it costs more to buy a tag for their dogs through the court than by purchasing it from the assessors.

A number of young people from the village attended field day and garden party given at the home of Mr. and Mrs. Frank C. Biggs, and report having had a happy time.

Dr. B. E. Thompson, who has been for a time confined to his home through illness, is out and around again very much improved in health.

Mrs. A. E. Walker, president of the Provincial Federated Women's Institute, left Friday for Religious, where she will attend the international convention of Women's Institutes.

During the past week dog owners in the township who failed to take out dog tags, were summoned before the magistrate and fined. The weed inspector determined that the provisions of the act will be carried out and intended issuing summonses to all who evade it.

The government has asked the Women's Institute of Ontario to co-operate in the fight against the spread of noxious weeds.

Mr. Blaier has posted notices in all parts of the township that no one will have an excuse for failing to comply with the act.

Heavy Shipments

Fruit dealers throughout the district report shipments of fruit and vegetables as having been unusually heavy this month, the express companies having handled as much up to this date as they did during the whole of the month last year.

The quality of the fruit has been quite good, creating a strong demand for all varieties.

Miss Helen E. Clarke was successful in passing the Normal School examination.

The resurfacing of the highway between the monument and Winona is proceeding rapidly, the paving company having already reached Winona.

Compliments are being extended to John and Mrs. Lee on the splendid home of their daughter and son-in-law, who was the winner of so many honours in the recent entrance examinations at Salford high school center.

The winning medal for highest marks in the centre was won by John, who obtained 688 marks out of 750. The Institute medal for highest marks taken by any pupil written at Salford high school center, was also won by John, and he also led for first place in the county for the Famous MacKenzie shield for highest marks in reading, writing, spelling and arithmetic. This speaks well for St. John's Church and the work of which R. J. Fletcher is in charge.
